

Project title

Minh Tran,

Abstract

One paragraph summary of the purpose, dataset, main findings, and interpretation.

Introduction

Brief description of the dataset (subjects, when/where/how collected, purpose).

Research questions

Mini codebook of variables selected (include details on recoding values, missing values, and variable treatment)

Statistical Results

One subsection per research question.

Include summary statistics, tables, graphs, and statistical tests.

Write a clear narrative (“tell the story of your data”)

Conclusion and Future Direction

Summarize main findings.

Discuss limitations of your dataset.

Suggest possible extensions or improvements.

Appendix (R code)
